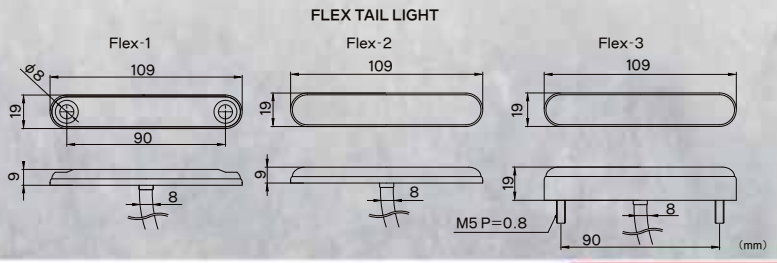
Flex-3

- Universal LED tail light.
- 12 pcs oval LEDs.
- Tail light and stop light in this compact-sized product.
- Reduced electric power consumption
- Works on 12V AC/DC.
- Dimensions : L109mm X W19mm X H19mm

Part number
D45-29-316



DRC MOTOLED
CRF-X TAIL LIGHT

- Fits CRF250X/450X.
- Tail light and stop light in this compact-sized product.
- Smaller and lighter than stock LED light.
- 8 high-intensity LEDs are used.
- Long operating life. Reduced electrical consumption. High impact, waterproofed, shock resistant.
- Lens colors available: red and smoke.
- Plug type terminals are included for installation.
- Works on 12V AC/DC.

DRC MOTOLED
IC RELAY FOR DC

Stock flasher relay is designed to work with standard bulb flashers. When the stock flasher is changed to LED flashers, the stock flasher relay does not work properly due to the difference in power consumption between the stock flasher bulb and the LED flasher. This IC Relay enables LED flashers to work in any configuration.
*Some models require the use of the stock IC relay along with this IC relay.(*1)
: Reduced electrical power usage.
: Some technical skill required for installation.
: One IC relay required for each bike.
: flasher pilot light can not be used with position light when installed on XR250.
: If the flasher operates like hazard indicators after installation, Indicator lamp wiring kit is required(below).
: Works on 12V DC.

*1----- RMX250S, DRZ400S/SM etc.

RESISTOR WIRE

When standard bulb flasher is replaced by LED flasher, electric consumption becomes low and stock flasher relay does not work correctly. This Resistor wire helps to stabilize the electric power to the LED flasher from stock flasher relay.
: Electric power consumption level is the same as with stock flasher.
: Easy installation.
: One resistor for one flasher. *Some models(*2)require 2 resistors.
: This harness will produce heat when used. Please install in areas where heat is not a problem.

*2 ----- XR230, DR250R, DRZ400S/SM etc.

INDICATOR WIRING KIT

This kit is required when flasher operates like hazard indicators after the IC relay installation.
Place these harnesses in-between the wires from the pilot lamp and the wires from the chassis.
*Some models(*3) requires this kit for proper operation.

*3 ----- XR230, KSR110, KLX250, D-TRACKER-`07 etc.
Part number
D45-91-051

INDICATOR WIRING KIT

■ Important note for using LED flasher

LED flashers have very low consumption and the stock flasher relay may not work properly. The most frequent problem, is that the LED may be flash at a quick rate using stock flasher relays. Please refer right side of chart to choose our IC relay or Resistor wire for your installation.

	Consumption	Difficulty of installation	Parts cost	AC or DC
IC Relay	O	△	O	DC
Resistor wire kit	×	O	△	DC/AC

*DRC IC Relay can not be used with motorcycles (XR50/100M, XLR250, WR250F/WR450F, XR650 etc)due to the AC power design. Please use Resister wire kit for AC power motorcycle.
